The industry's FIRST 100% recycled snow guard made from post consumer polycarbonate. You can be "green" and still use a trusted and proven snow guard model. Made mostly from recycled 5 gallon water bottles and compact discs. The Eco-Blox "DEUCE" can be adhesive or mechanically fastened and requires a 1.5" flat mounting area. The Eco-Blox is available in Clear with a slightly darker UV tint. Professional ATI test results show the SnoBlox Deuce held up to 3456 pounds when screw mounted and 1379 pounds when adhesive mounted using the SB-190. All tests were performed simulating realistic snow loading conditions applied to the face of the guard.

Placement in just isolated areas such as chimneys, doorways, vents and partial roof sections is NOT recommended.
