# Model 12-16
Fits Up To 16" Standing Seam Panels

8" x 19" x .25" Base Plate

Model 12-24
For Panels Between 17" To 24"

8" x 27" x .25" Base Plate

The SS Ventsaver is an optional mounting plate that makes the Ventsaver 151, 383, and HD Ventsaver products compatible with most Standing Seam roof panels. (4) RCT seam clamps attach to the seams without penetrating the panels. The SS Ventsaver utilizes a custom fit Ice Ramp to protect the base of the pipe from sliding snow and ice damage while the fin of the Ventsaver protects the upper portions of the pipe. The all aluminum SS Ventsaver kit is manufactured in the USA and uses stainless steel set screws and fasteners.

- Non-corrosive components
- Made in the USA
- Compatible with over 500 seams, visit www.Ventsaver.com for Panel Matrix
- The only product in the industry that protects the upper and lower portions of the pipe from sliding snow and ice.

This kit includes:
- (1) 1/4" Adjustable Aluminum Plate
- (1) 1/8" aluminum Ice Ramp w/ edging strip
- (4) RCT universal fit standing seam clamps
- (12) Tek screws – ¼" x 1" 3/8" hex head
- (12) Set screws for the clamps – 3/16" hex/allen drive
- (4) 9/16" hex RCT top bolts with stainless washers
- (1) 3/16" hex bit for set screw tightening
